

Process filtration specialist manufacturer

AMAZON FILTERS LTD. makes what it sells.
We control our own quality, cost and lead times.
Our rigorous procedures and approvals ensure that quality is assured when Amazon products are chosen.

Our success is underpinned by quality and also through the application of our knowledge.

As well as what we make and how we make it, is how we apply it to our customers.

This is Amazon's key differentiator and is the secret of our progression into a true, globally recognised brand.

Do you know that Amazon provides:

- A comprehensive off the shelf range of UK manufactured Stainless Steel filter housings
- A variety of connection and couplings available as standard (screwed, flanged, dairy type fittings etc.)
- Specialist Super Duplex and Alloy 22 filter housing fabrications
- Bespoke and Coded designs available (PD5500/ ASME etc)
- An own manufactured range of process filter consumables
