SOLUTIONS

Services to deliver your project on time, and on budget

Energy Project Services Specialist

From green field development of fabrication yards to the fabrication of multi-million deep water EPC projects, pipeline design and installation to a new building or conversion of a wide range of floating oil and gas assets, our team of skilled engineers, project managers and consultants have in-depth industry knowledge and expertise to identify risks and provide solutions to every aspect of your project.

Project Engineering Services

Cost and schedule are critical factors in ensuring the successful delivery of any project. We optimise your design and build / deliver strategies based on our extensive knowledge of worldwide construction facilities as well as the most cost-effective fabrication methods. EPC Solutions enhances material selection and utilisation within your design based on raw materials costing and availability. We develop accurate and achievable fast track schedules with full transparency of the critical path and associated risk and provide detailed CAPEX estimations and breakdowns based on current market rates.

Our engineering services focus on concept, front-end, feasibility, constructability, load-out and transportation which include but are not limited to:

- Design concept validation
- Build strategy definition
- Build location selection
- Sub-contractor selection
- Materials selection and optimisation
- Process and sequence definition
- Load out and transportation engineering
- Load out and transportation planning
- Cost estimation
- Cost validation
- Schedule preparation and validation
- Risk profiling and definition

Project and Construction Management Services

Our team of experienced engineers, planners, inspectors, discipline leads, construction and project

managers lead the delivery of your project from concept through to installation and commissioning on a turnkey basis or integrate seamlessly into your existing management teams.

Our team are there to support every phase of your project and ensure its success.

Terminal Services

With our European based partner, The Monobuoy Company, we provide a range of CALM buoy and terminal services in the Middle East region. Our turnkey solutions include fabrication, refurbishment, delivery, installation, inspection, upgrade and through-life support services.

We specialise in:

- Supply of new CALM buoy systems
- Delivery and installation of CALM buoy systems
- Inspection and maintenance of existing CALM buoy systems
- Dry-docking and life extension of CALM buoys
- Upgrade of existing CALM buoy systems and components
- Supply of spare parts
- Engineering design and analysis
- Terminal operation and maintenance training

Fabrication Services

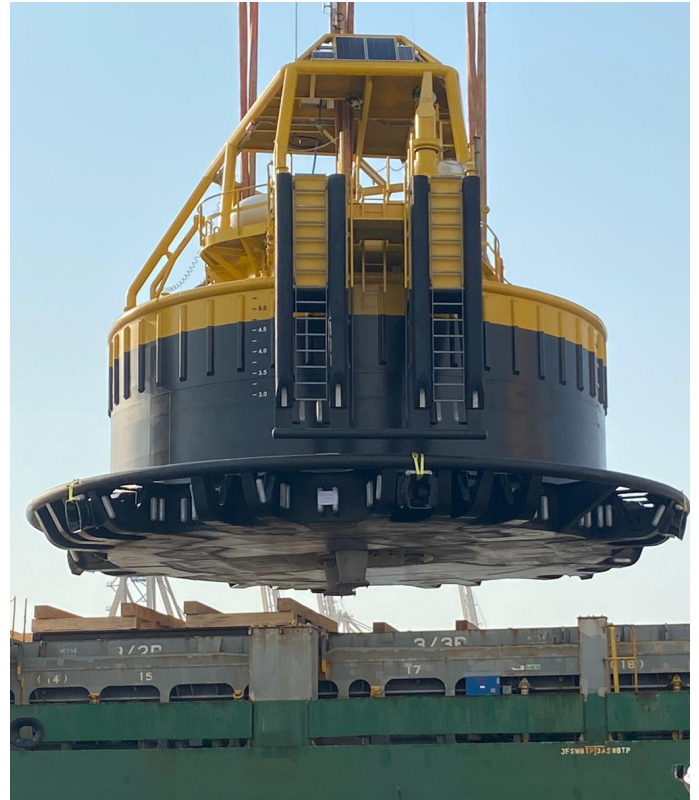

EPC Solutions provide the turnkey design, procurement, fabrication, commissioning, delivery and installation of energy and process modules as well as skid packages. Our team design to your specific project applications and we provide delivery and on-site commissioning support.

Filtration Services

As the Middle East agent for Amazon Filters, a leader in process filtration technology, EPC Solutions supply turnkey filtration solutions for all industry applications including the design and fabrication of skids and package units as well as consumables and element replacement.

Agency Services

We provide on-the-ground agency services including representation, marketing and sales support in the Middle East region.

Global Inter Certification

Management Systems Certification Body No. MSCB-108

CERTIFICATE

No. 22-A-12020020 Rev.0

This is to certify that

E.P.C. SOLUTIONS FZC.

of
